A woman is standing on a large, light-colored stone lotus-shaped pedestal. She is wearing a teal saree with a pink and green floral pattern. The saree has a wide border with a repeating circular motif. She is also wearing a matching teal blouse with a small floral pattern. She has her hands clasped in front of her and is looking down. She is wearing a traditional Indian jewelry set, including a bindi, earrings, necklaces, and bangles. The background shows a white stone railing and a yellow wall.

These floral pieces will help you get through spring in style

Floral prints are a timeless fashion staple. They are versatile, romantic, feminine, and evoke the arrival of spring, bringing with them joy and vitality. But where does the love for these prints come from? Their origin dates back to the early 1800s, when they began to be used on silk and other lightweight fabrics. Since the late nineteenth century, the floral pattern began to spread on dresses, shirts, and accessories, becoming one of the most appreciated decorative motifs.
